6.10.19 Release Notes

Enhancements

Website

Email Editor

- **Added New Email Editor with Event Snippets to Default Event Notifications.**

  Use Case: Users now have access to the New Email Editor when creating or editing Default Event Notifications, including the ability to leverage event-specific snippets.
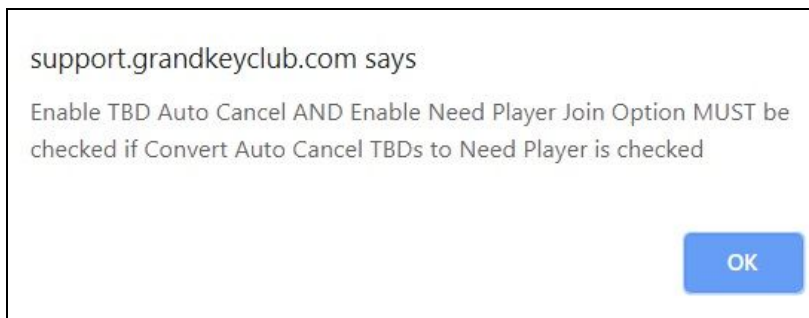

Bug Fixes

- Fixed an issue with CRM when a note, activity, or other type of child record was edited and saved, it would produce a webpage error when clicking the delete button from its respective view.
- Fixed an issue with CRM when sending a Campaign and choosing send to object, then individual records, only the first selected record would receive the campaign.
- Fixed an issue with CRM when updating a child record from within the parent record, the changes would not be reflected until you reloaded the page.
- Added a flag within Tee Times Global Settings so that Users cannot select 'Convert Auto Cancel TBDs to Need Player' without having 'Enable TBD Auto Cancel' AND 'Enable Need Player Join Option' settings both being checked. See settings below, where in order for setting 1 to be successful, settings 2 & 3 must also be checked.

  If these settings are not selected properly, Users will receive the following error message:

support.grandkeyclub.com says

Enable TBD Auto Cancel AND Enable Need Player Join Option MUST be checked if Convert Auto Cancel TBDs to Need Player is checked

OK

- Fixed an issue with the Mobile App where a hyperlinked email address was not opening the default mail client on the User's phone as expected.
- Fixed an issue with the Clubessential Android Mobile App where the drop shadow setting was not working properly.
- Fixed an issue with the iOS Mobile App where the directory view was not displaying properly on certain iOS devices.
