Pulling Clubtec Member File

FAQs

Overview

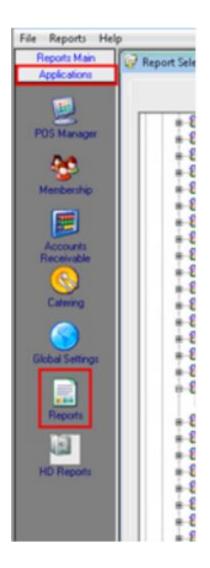

This guide reviews how to pull a **member roster file** from **Clubtec** to import it into the website **Directory** using **Roster Sync**.

Use Case(s)

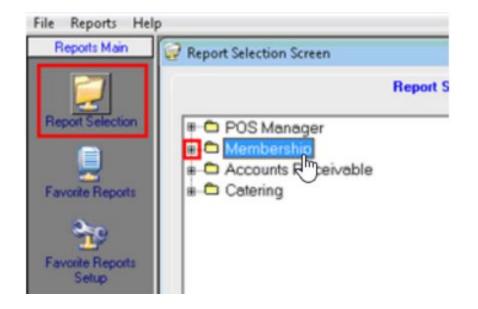

Each time your **online member directory** needs to be updated, the **member roster file** must be pulled from **Clubtec** and uploaded to the website using **Roster Sync**.

Pulling Clubtec Member File

First, open the ClubTec Manager and then select **Applications > Reports.**

Next, click Report Selection > Membership (click the + sign to expand the options).

Click Listing Reports (click the + sign to expand the options).

Click Roster Export > Click rptMemListRosterExport.

The location to **export** should be set to **c:\ce_rs** (or where the ce_rs folder is located on the computer).

Name the file **memberroster**.

FAQs

Q: My statements aren't up to date on the website.

A: This is because with Club Tec, statements have to be manually generated then ran through Sync Client. Please contact Clubessential Support for more information on running statements.
