

03.20.17 Reservations Releases

Bug Fixes

- Fixed an issue with the Event Manager pop-up window being unable to close due to JavaScript error.
- Fixed an issue with the Event Manager where the cancellation time would be incorrect. Cancelled reservation timestamps were not applying the proper time zone offset.
- Fixed an issue with the Tee Time Special Event form integration that was not setting the proper status of reservations once the form was completed.
- Fixed an issue with the Mobile Tee Time booking window which would edit player 6 into the player 5 slot when booking a group reservation of two fivesomes.
- Fixed an issue where the course name would not be updated on confirmation and email notifications when a tee time was moved to a different course.
- Fixed an issue with public Tee Times not sending guest notifications to all guests including those who were booked by admins in the booking center.
- Fixed an issue with overlapping spa reservations that could be booked if the reservations overlapped in time but do not during their prep or cleanup time.
- Fixed an issue where the Dining Lottery was not pulling all reservations due to missing status type for in progress lottery requests.
