Enhancements

Notifications

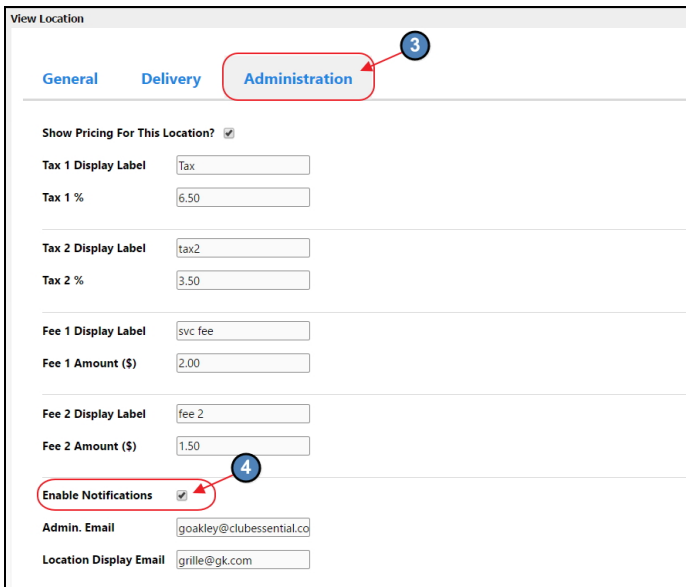

- As a Club Admin, I would like to be able to turn online ordering email notifications on or off.

Use Case: Previously, notification settings (regarding order status) were not able to be turned on or off. Now, easily enable or disable email notifications from being sent by Location at the Club.

- **Minimize the number of times a member receives an email about their pick-up order.**

Use Case: Previously, notification settings (regarding order status) were providing updates at every stage of the order. Now when enabled, Members will receive emails only when their order is received, and when it is ready for pick-up.
