[Bug Fixes](#)

Enhancements

Email Editor

- Added the option to set an expiration date to public link when using the “link to page” functionality.

Use Case: Previously, when a page link was sent (via email, Link to Page option), and was made public using the Bypass Login feature, there was no ability to expire the link. With this new feature, enhance the security surrounding your distributed link by entering a date when users will no longer be able to access it.

Page Properties

- Added “Menu Item Title” field to allow the user to change the display name of a page in the navigation independently from the page title.

Use Case: In a recent release you gained the power to control your page titles/navigation. Now, utilize the Menu Item Title to control what appears on your site’s Navigation (ei - Dining), and enhance your searchability by utilizing the Page Title field for more in depth descriptions to be read by search engines. Click [here](#) to read more info on Google’s recommended Best Practices pertaining to page titles and meta descriptions. Or, contact your Account Manager to learn more about Clubessential’s M3 services.

The image consists of two screenshots. The top screenshot shows the admin dashboard with a grid of menu items. A red box highlights the 'ADMIN' tab, and a blue circle '1' points to the 'COMMUNICATION' column. Another blue circle '2' points to the 'Page Properties' link in the 'CONFIGURATION' column. The bottom screenshot shows a browser window with a navigation menu. A blue box highlights the 'NAV TITLE' in the menu, and a red box highlights the 'Page Title' in the browser's address bar. A 'Page Properties' dialog box is open, showing the 'Page Title' field with a red box around it and the 'Menu Item Title' field with a blue box around it. The 'Page Title' field contains the text 'Page Title', and the 'Menu Item Title' field contains 'Nav Title'. Other fields in the dialog include 'Meta Keywords' (Grand Key, Resort, Private Club, Private Resort), 'Meta Description' (Visit this page to learn all that the Grand Key Resort has to offer! It is guaranteed that you will have an amazing, relaxing, and fun-filled time with us.), 'Search Tags', and 'Page Alias'. A 'Save' button is at the bottom of the dialog.

Bug Fixes

- CMS - Login forms that exist inside a mega menu dropdown on the main nav, cannot focus on the username and password fields.
- Event Manager - Event Billing Payment Link Issue - Payments could not be completed.
- Member Directory - Error when attempting to access the Search function within the Member Directory module.
- Member Directory - Increased line count on export functionality to address PGA concerns.
