04.16.18 Release Notes

Bug Fixes/Minor Modifications

- Fixed an issue with CRM Email Campaigns sending email after the scheduled end date of the campaign.

- Fixed an issue when booking Dining Reservations that incorrectly reported the availability of seats available for a reservation.

- Fixed an issue with Event Manager that was showing incomplete registrations as booked.

- Fixed an issue with Mobile Menu so proper Member/Relationship Status would flow through and display on the App.

- Improved reporting capabilities to track Mobile App logins.
