[Bug Fixes](#)

Enhancements

Mobile App

Push Notifications

- **Added functionality allows Users to receive Push Notifications on all devices with the App installed.**

Use Case: Previously, Users would only receive Push Notifications to the last device they signed into. Now, added functionality allows Users to receive Push Notifications on all devices where they have the App. This will require the newest update to your Club's app once available in the stores.

Bug Fixes

- Fixed an issue on Mobile App and Mobile Tee Sheet where Starter Times were not displaying for Clubs that had Starter Times on both the 1st and 10th tees.
- Fixed a recent issue with Members being able to edit Dining Reservations and move them to a Blocked time slot.
- Fixed an issue where all events were showing on Filtered Calendar views on Android devices.
