8.12.19 Release Notes

Bug Fixes

- Fixed an issue with CRM Campaigns targeting multiple email addresses, the Campaign would only send to one of the selected email addresses. Now sends to all targeted email addresses.
- Fixed an issue with the Reservations TBD drop feature not working on days with a Lottery schedule applied.
- Fixed an issue with Dining Reservations made within an Admin Block. When Members would open a reservation to edit, the reservation time would revert to the first available time for the day.
- Fixed an issue with the Rounds by Player Type tee times report not pulling any data. The Netcaddy Stats service was only running for some sites in the list and then crashing.
- Fixed an issue in identifying missing or mismatched payment transactions with Events and PayCloud. A new process has been added to reconcile the event payment data between Paycloud and the Website.
- Fixed an issue with the mail service on the Website where some emails were not sending or potentially sending duplicates.
