⬡ PayCloud v3.2 - 8.14.19 Release

Enhancements

CE Payments

- **Allow Club and Member fee configuration in PayCloud.**

  Use Case: Changed fee calculation and configuration method for CE Payments fees to be handled completely in PayCloud. Also, changed the method of sending settlement data to Office to account for this new fee configuration

- **Added processor specification to Credit Card Authorization flow.**

  Use Case: To support applications that have both Card Present and Card Not Present processors, Development made a change to specify which application was trying to be authorized.

Mobile View

- **Enhanced Mobile view for Statements and Minimums.**

  Use Case: Added minimum section to the Mobile Statement view. Also, moved Current Activity Minimum section to be consistent with the above change.

Bug Fixes

- Fixed an issue with wording on CE Payments ACH confirmation page that used to read "Credit Card" to "Bank Account".
- Fixed display on the Statement View of returns that included a return to credit book.
- Fixed an issue that prevented emails from sending if a Member had a blank first or last name.
- Fixed an issue that could clear some setting values if a Club Admin without proper permission attempted to save a setting change.
