

## 6.8.20 Axis Release Notes

### Enhancements

- **Added module specific snippets to the new email editor in Reservations and CRM.**

*Use Case:* From within the snippets menu of the new email editor, module specific snippets for Tee Times, Dining, Courts, and CRM are now available when launching the editor in those areas.

- **Added a message to queued group emails indicating they are in progress.**

*Use Case:* Within mail reporting for any message that is queued and has not yet sent, the following message will appear:

<b>Sent By</b>	RJ Hoendorf
<b>Sent</b>	Message sending currently in progress. Please check back soon.
<b>Recipients</b>	ALL MEMBERS
<b>Status</b>	Message sending currently in progress. Please check back soon.

- **Added Guest Type dropdown to Tee Times in Mobile and App.**

*Use Case:* Previously, if members had access to select the Guest Type when configuring guests for tee times, this could only be done via the desktop site. Now, this dropdown option will appear when applicable when configuring guests on the Mobile website or the App.

### Other Features/Bug Fixes

- Fixed an issue that resulted in a “noindex, nofollow” meta tag appearing on pages even when the “Disable Indexing” page property checkbox was not selected
- Fixed an issue that caused TBD slots to still appear as TBDs on the tee sheet after being converted to Need Player slots.

- Fixed an issue that caused CRM specific snippets to not appear in the old email editor.
- Fixed an issue that resulted in duplicate CRM activity/task records when clicking the save button multiple times.
- Fixed an issue that allowed members adding themselves to Need Player slots in multi-time reservations to cancel one or more of the times.
- Fixed a display issue with the “Page Size” dropdown in Image Explorer
