# Enhancements

## CE Payments

- **Improved Error handling for CE Payments payment attempts where the fee amount would be greater than the payment amount.**

Use Case: When a payment is attempted, and the payment amount is less than the amount of fees applied to the payment, an error will be shown and the payment will not be processed.

## Member Payment Portal

### Styling Changes

- **Improved styling on the member facing PayCloud Payment Portal**

Use Case: Functionality of the following buttons will remain the same, but certain elements will have slightly different look and feel, such as

- Button color
- Header sizing
- Table layout
- Etc.

## Bug Fixes

- Fixed a problem that could allow an accidental double submission on the scheduled payment page to schedule more than one payment
