

PayCloud v3.7 - 12.16.19 Release

Enhancements

- **New Account enrollment on the Make a Payment and Schedule Future or Recurring Payment pages have been updated.**

Use Case: Enrolling a new account will now change the default selected payment account on the 'Make a Payment' or 'Schedule Payment' pages to be the newly enrolled account, otherwise the default is the account used in the most recent successful payment. See an example of the default demarcation below.

The screenshot shows the 'Make A Payment' page with a navigation bar at the top containing 'Make A Payment', 'Statements', 'Manage Payment Methods', 'Payment History', 'Credit Book Activity', and 'Current A'. The main content area is titled 'Payment Method' and includes a 'Bank Account' section with a radio button for 'Pay With New Bank Account'. Below this is a 'Credit Card' section with three 'VISA' options, each with a radio button. The third 'VISA' option is highlighted with a red box. There is also an 'Add Credit Card' link. To the right, there is a 'Manage Payment Methods' section with a link to 'Schedule a future or recurring payment' and an 'Upcoming Payments' section with a link to 'View Scheduled Payment History' and the text 'There are no upcoming payments scheduled'. At the bottom, there is a 'Payment Amount' section with a text input field showing '\$ 0.00' and a 'Continue' button.

Bug Fixes

- Fixed an issue with Statement and Current Activity views where a transaction would sometimes display its total twice.
- Fixed a display issue in the 'New Autodraft' grid where some current period payments may not be factored into the Draft Amount column when drafting for Statement Balance.

- Fixed an issue preventing the 'Remember Me' feature from working for Club Admin logins.
